

# SERVICES

Power Engineering Corporation (PEC) was established in 1922. PEC has since flourished into a full service mechanical company with in house engineering and design capabilities, a highly trained mechanical construction division, a state of the art 24-hour service fleet, and sheet metal fabrication and installation capabilities. PEC specializes in design-build projects but we have a presence in the plan and spec market. Our value engineering skills are unparalleled when trying to get a project in on budget. PEC competes in the following venues: industrial, laboratory, hospital, commercial and textile markets. We also enjoy a great deal of work locally from institutions of higher education and other private sector markets. PEC client base includes such industry powerhouses as, Cargill Foods, TJ Maxx, Offset Paperback, and Shop Rite Markets.

## Engineering

We are a full service mechanical engineering and construction firm. PEC's capabilities include initial design, conceptual cost evaluation, value engineering, system installation and commissioning. We have the specialized ability to design systems for complex industrial applications where temperature and humidity conditions are an essential component of the manufacturing process. Our early involvement in your mechanical design projects can produce significant savings and assure system performance.

## Mechanical Construction

We have been successfully installing our mechanical designs as well as the plan and spec projects we have been awarded for over 80 years. We are well versed in a wide variety of piping systems including natural and liquefied gas, hydraulic, vacuum, high pressure nitrogen, compressed air, steam, direct expansion refrigerant lines, chilled water and condenser water. We also handle the rigging of all the equipment we furnish.

## Sheet Metal

We have fabrication and erection capabilities for all your ductwork needs. We can fabricate or supply specialty items such as hoods, access doors, dampers, etc. for those odd sizes that our impossible to find or require to long a lead time. The coil line and plasma cutter are operated by the "Quick Pen" and "Vulcan" systems which are the best 3-Dimensional CAD programs in the industry. We are able to receive timely response for all of our project needs with these technological capabilities as well as the talent of the highly experienced crews that fabricate and install the materials.

## HVAC Service

We have a fleet of highly trained service technicians ready to perform preventative maintenance work as well as breakdown service in a timely efficient manner. We are the oldest service organization in our area and are priced competitively. Please call or email our service sales manager, Tim Skopic, for an estimate on maintaining your valuable investment. We will be happy to design a plan to meet your company's specific needs.

## Building & Process Controls

We design, install and maintain electric, electronic, pneumatic and digital control systems.
